LOCATION: (1)...(31)
OTHER INFORMATION: Mutant T7 RNA polymerase wild type.
NAME/KEY: misc. eature
LOCATION: (25)...(25)
OTHER INFORMATION: Nucleotide 25 is "n" wherein "n" = any nucleotide.
                                                                                                                                                                                                                                                                           ö

Jeguence 15, Application US/07808452
Patent No. 6063612
GENERAL INFORMATION:
APPLICANT: Jayasena, Sumedha D.
TITLE OF INVENTION: Antiviral Reagents Based on TITLE OF INVENTION: RNA-Binding Proteins
NUMBER OF SEQUENCES: 24
CORRESPONDENCE ADDRESS:
ADDRESSEE: Law Offices of Peter Dehlinger
STREET: 350 Cambridge Avenue, Suite 300

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            13,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 6

                                                                                                                                                                                                                                                                                    Sequence 1295144, Application US/10310914A

Publication No. US20060003322A1

GENERAL INFORMATION:
APPLICANT: Benewich, Isaac
APPLICANT: Shiler, Wuzat
TITLE OF INVENTION: Bioinformatically detectable group of novel regulatory genes and TITLE OF INVENTION: uses thereof
TITLE OF INVENTION: uses thereof
CURRENT APPLICATION NUMBER: US/10/310, 914A
CURRENT PILING DATE: 2002-12-06

Publication No. US20060003322A1

GENERAL INFORMATION:

APPLICANT: Bentwich, Isaac
APPLICANT: Shiler, Kvuzat
TITLE OF INVENTION: Bioinformatically detectable group of novel regulatory genes and
TITLE OF INVENTION: Uses thereof
TITLE OF INVENTION: Uses thereof
TITLE OF INVENTION: Uses thereof
CURRENT APPLICATION NUMBER: US/10/310, 914A
CURRENT FILING DATE: 2002-12-06
NUMBER OF SEQ ID NOS: 1388402
SOFTWARE: Patentin version 3.3
SEQ ID NO 288225
LENGTH: 20
